CA Cancellation  
MD Modification  
NE New

NT Notification  
RM Renewal/Modification  
RO Renewal Only

Action Key:

D Dismissed  
G Granted

R Returned  
T Terminated

The following information is intended to help interested parties transition to the Public Notice formats we will be using under the Universal Licensing System (ULS). At this point, applications in the following services are being processed via ULS and will be listed on the "site-by-site" Public Notices: Paging (Part 22 only), Offshore, and Cellular. Normally, applications accepted for filing and actions taken Monday through Friday of each week will appear on a ULS Public Notice the following Wednesday.

Below are some specific changes we'd like to point out.

For all services,,,

(1) Radio service codes are found at the beginning of each Public Notice section, rather than being embedded in the application file number. Also, a specific action date is listed for each application, rather than referencing the date of the Public Notice.

(2) There is no longer a special designation for applications involving an Environmental Action. Interested parties may use the ULS Application Search function to review applications listed on the Public Notice in order to determine whether a particular location has a proposed environmental effect. This information is found on Schedule D for each location.

(3) Major modifications affecting location data (i.e., site parameters such as latitude, longitude, height AMSL, tower registration information) will result in a separate entry on the Public Notice for each frequency affected at that location.

For cellular...

(1) There is no longer a special designation for Phase I and Phase II unserved area applications. Interested parties should focus on the application purpose for each application, which will be NE (new) for Phase I and Phase II applications. As a practical matter, all applications where status = NE are Phase II.

(2) Market number will no longer be listed for each application. In its place, we will provide the latitude/longitude and city/state of each location.

(3) There is no longer a special section for major modifications. As a practical matter, all applications on the weekly Public Notice with application purpose = MD (modification) are major modifications (i.e., minor modification do not routinely appear on Public Notice).

(4) "The Public Notice will no longer contain conditions related to interference protection and extensions into other licensees' Cellular Geographic Service Areas, as these are covered in our rules and on the actual licenses themselves."

Feel free to contact our Licensing Support Team at (202) 418-7ULS or via email at [bwoodwar@fcc.gov](mailto:bwoodwar@fcc.gov) if you have further questions.
